

If you want to be a manufacturer of industrial mesh, we are just the partner you are looking for

Crimped Wire Mesh Machine/Wire Crimping Machine  
APM-AM-F101/F102, APM-SM-S101 & SK101, APM-SM-H101 & HS101

**HEBEI ZONGHANG MACHINERY MANUFACTURING CO., LTD**

ADD: CIRCULATION CHEMICAL INDUSTRY SHIJIAZHUANG CITY HEBEI CHINA TEL: +86-311-66792197 FAX: +86-311-66792192 Website: [www.wiremeshmachineschina.com](http://www.wiremeshmachineschina.com)

## 1.Application Range:

## Machines for the production of high-quality screens

The APM Crimped wire mesh machine are designed for high economy and for highest-quality screens and wide used in the mine griddle mesh; vibration screen mesh ; animal cage or fence, barbecue griddle mesh and decorate mesh. Which suitable the international quality standard as follows:

- Screen length and width tolerance is  $\pm 5\text{mm}$ , screen diagonal catercorner tolerance is controlled within 1.5mm every 300mm length
- Flat surface and suitable tightness
- Aperture tolerance  $\pm 3\%$
- The weaving waste rate is no more than 3%

## 2.All from one Vendor

The Crimped wire mesh machines of the type AM and SM are very bestweaving machines and cover the entire market of heavy sieve fabrics. They enable the production of different screen geometries in small to large lot sizes at competitive prices.

APM offers machines with different automation levels that can satisfy all these demands. For example, we produce automatic crimped wire mesh line, consisting of screen assembly machine and weft wire crimping machine for the economic production of larger production quantities.

Semi-automatic and Hydraulic crimped wire mesh machines with manual weft insertion complete our production program for smaller lot sizes and the production of single items.

Depending on your range of products, APM China offers you various APM Crimped wire mesh machine and Crimping machine, all from one vendor.

# The optimum configuration of the Crimped wire mesh machine

The right concept for individual demands:

The lower cost and high quality mesh could help the buyers take the cost back soon and establish a long cooperation with the end user.

## **APM-AM-F101**

Crimped wire mesh machine for production crimped screen with wire diameter 0.7-2.0mm screen by automatic weaving.

## **APM-AM-F102**

Crimped wire mesh machine for production crimped screen with wire diameter 1.0-3.0mm screen by automatic weaving.

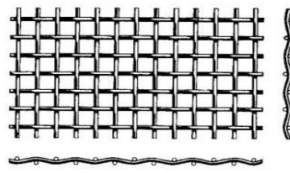

## **APM-SM-S101&SKS102**

Crimped wire mesh machine for production crimped screen with wire diameter 1.5-6.0mm or 8.0mm screen with the weft wires are introduced by hand or automatic connect with the wire crimping machine together by servo driver

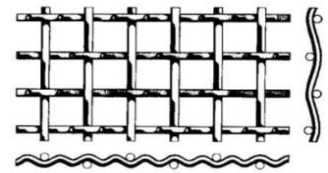

## **APM-SM-H101&HS101**

Crimped wire mesh machine for production crimped screen with wire diameter 5.0-12.0mm screen with warp and weft wire are introduced by hand. Or Self-cleaning crimped mesh with wire diameter 1.0-4.0mm by four heddles frames.

## APM Wire Crimping Machine

APM China offers a large range of additional modules and Crimping machine. The following options represent a selection from our range of goods. The wire crimping machines FC101/102, SC101 and HC101 are the right complement for the optimum preparation of the warp and weft wires for the APM Crimped wire mesh machines. We also designed Heavy Full PLC Wire Crimping Machine SK-40

# Fully Automatic Crimping Machine SK-40 (Ø2.0mm-Ø12.0mm)

- All setting can be made from a touch panel (CNC system incorporated)

## Specification

| Wire diameter | Speed            | Motor   | Diameter of Crimping wheel |
|---------------|------------------|---|----------------------------|
| Ø2mm-Ø12mm    | 20mtr/min<br>Max | Main Servo: 380V 7.5KW<br>Cutter Srrvo: 3KW<br>For Adjusting depth of crimping (Servo) :1.5KW | 335-370mm                  |

## Features

**Speed:** Can freely to be set up to maximum 20mtr.min. for a digital display.

**Length Setting:** Set on a counter. Just setting the crimped wire length which you would like to do, CNC control.

**Cutting:** You can cut anywhere you want to cut, which was no possible with the earlier machines. Therefore you do not need to cut the wire again in another process (Material loss is reduced).

Note: This feature is particularly effective with the flat top type.

**Crimping Depth:** The crimping wheel can be moved up and down by servo motor and the depth can be adjust in 0.01mm-100mm increments from a digital display, and it can be recorded.

**Crimping shape balance :** The balance can be easily adjusted and recorded, therefore you can immediately and accurately crimp using recorded data

**Coil Stand:** Wire rack is passive brake disc, only control stop, do not control start, can be used and rotated for the maximum weight 1200kg.

**Machine Stopping:** When the preset crimped wire count is reached

## 4. Technical data

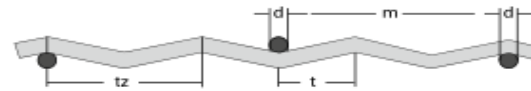

### Kind of Screen

Whether you require crimp screens or press screens, APM China offers the corresponding machines and tools for every demand.

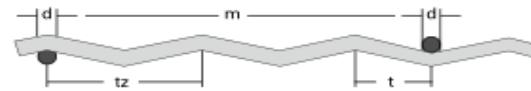

Crimped Screen with  
wires in 1st crimp:  $t=m+d$

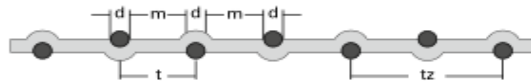

Crimped Screen with  
wires in 3rd crimp:  $t=1/3 (m+d)$

Crimped Screen with  
wires in 5th crimp:  $t=1/5 (m+d)$

Pressed Screen,  
wires pressed both sides:  $t=m+d$

Pressed Screen,  
wires pressed one side:  $t=m+d$

$tz$  = tooth pitch of crimp or press wheels

Our aim is to increase the productivity of our customers and to increase the operating life of their machines. Therefore we also provide customer service support after the start-up of a APM Crimped wire mesh system.

### Helpdesk

For general technical questions and repair or maintenance issues, please contact our Company Email by phone or via Internet.

### Field service

For prompt help on the spot, our field service specialists offer expert support worldwide.

### After-sales service

Strict calibration and debugging one year before shipment  
Comprehensive technical training/timely spare parts supply

### Spare part service

We have our own parts production workshop, strong inventory to provide you with high availability and rapid replacement of machine parts

## Contact

If you send mail urgently, and without my revert, Please contact via phone or whatsapp number: +86 13373217655

I will be on the phone with you, do not mind to call me, any problems of our machines, we will help you solve it on time. we have a best technology team, can help you solve the questions via video, photos, drawing, and engineer abroad service.

## Core competence

Hebei Zonghang Machinery manufacture is new name for export and the old name is JinJingwei Machinery manufacture which began to operate in 1983 and divided from our Army machinery factory in 1995.

APM focuses on WIRE MESH MACHINES & WIRE MESH LOOMS SOLUTIONS,

Our factory are the leader manufacturer in SS wire mesh weave machines in China, We have larger number of customers in India & China market,

In last 20 years, we sold more than 8000 set machines in local market, we will bring our advance technology to wire mesh Industry.

last 5 years, we supply the machines to Indian market, help them build factory, training worker, teach skills, and expanded business, we believe, choose to cooperate with us are your lucky thing. From 2008 to till now. Our machine are widely exported to India, Egypt, France. Iran, donesia.

Malaysia. Jordan, Bahrain and Africa etc. 25countries till now.
